

Kodak S3000 Series

Outstanding Departmental Scanner

The Kodak S3000 Series has claimed the BLI Winter 2021 Pick Award for Outstanding Departmental Scanner from Keypoint Intelligence thanks to its...

- Outstanding reliability as well as OCR accuracy and compression capabilities
- Integration with Kodak Info Input to optimize business processes where paper-based information needs to be entered into digital workflows, repositories, and cloud solutions
- Secure, distributed capture capabilities
- Easy user experience and setup procedures

"The Kodak S3000 series offers fast and reliable scanning for multi-user, departmental capture environments," said Lee Davis, Associate Editor of Software/Scanners at Keypoint Intelligence. "Bundled with Kodak Smart Touch, users can convert documents into fully searchable, editable files and, with the press of a button, send them to email, cloud services, business applications, and more. The devices also leverage built-in image process and Perfect Page to automatically optimize image quality, even when scanning poor-quality originals. The series also supports intelligent capture solutions like Kodak Capture Pro Software and Kodak Info Input, which enable businesses to automate tasks like naming and routing files, extracting data, indexing documents, and more."

"Kodak S3000 series devices are among the most reliable and accurate in their respective competitive groups," said Len Wolak, Senior Test Technician at Keypoint Intelligence. "Each device was perfect during reliability testing and were 5% to 10% more accurate than the competitive average. The devices also impressed during file-size testing, outputting smaller than average files in most categories tested. We were also impressed with the EasySetup feature and the Secure-boot solution. The former enables users to set up network configuration settings by scanning a page, while the latter ensures that only trusted firmware can be loaded on the device. Together, these features will help IT departments save a lot of time and protect their scanners."

About Keypoint Intelligence

For 60 years, clients in the digital imaging industry have relied on Keypoint Intelligence for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry's most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence to improve business goals and increase bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers', channels', and their customers' transformation in the digital printing and imaging sector.

About BLI Office Hardware Pick Awards

Buyers Lab Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including an extensive durability assessment and evaluation of key attributes such as usability, image quality, and value. Each product that passes its lab test earns the Highly Recommended or Recommended Seal and a Certificate of Reliability, with the best performers qualifying as Pick contenders.
