

INfuse Smart Connected Scanning Solution

New connections for smarter workflows

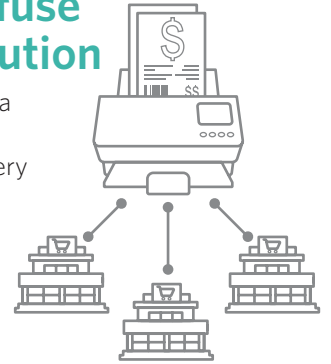

Today's high cost of transportation and capture

- Pick-up or mailing of documents from multiple locations is expensive and slows processing
- Extending capture via thick-client solutions, requires costly remote management
- In addition, coding of customized workflows demands a large IT team and impacts the cost base

Streamline processes with more accurate and timely capture with the INfuse Smart Scanning Solution

- Capture documents on location via INfuse AX Scanners
- Instant feedback provided that every document is properly captured - with alerts received for any issues
- Eliminates potential transport problems of missing documents and lost envelopes

INfusing savings. Eliminating pick-up/ mailing. Reducing remote management.

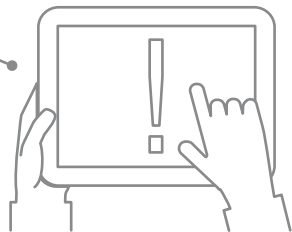

For implementing the INfuse capture solution to 50 locations, with each capturing 100 documents daily:*

- Savings of up to \$15K in shipping/ mailing costs per year
- Removing location-specific remote management generates \$20K in savings, thanks to centrally managed INfuse Smart Solution
- Gain greater real-time insight and up-to-date status information

Savings of **\$15,000** per year

Generate **\$20,000** in savings

Greater knowledge and insight achieved

- You now receive documents instantly, as scanned
- Receive real-time status updates and location-level insights
- Immediate feedback eliminates costly exception processing
- All scanners managed centrally via INfuse Management Software for easy deployment of upgrades and new options
