INfuse Smart Connected Scanning Solution

# New connections for smarter work

The INfuse Smart Connected Scanning Solution can boost productivity and transform the way you work in multiple, positive ways. Driverless and PC-less, it sits at the front edge of your processes and is designed to efficiently onboard content into your specific business process. Now you can directly import documents and information and send them exactly where you like, while receiving real-time acknowledgement at the point of scanning. Spend less time managing documents and more time managing your business.

Thanks to immediate exception notifications, missing forms, signatures, and other critical information issues can be caught and corrected instantly, saving you money and enhancing employee productivity. Using our customized connectors, easily scan to your current hosted Cloud storage solution directly from your scanner. The INfuse Smart Scanning Solution improves how your business deals with important information – in-house or in the Cloud.

It's smart

- Simply scan one set-up sheet and you're up and running
- Access automated workflows
- No end-user training required
- Get finished image files directly from your scanner
- Intelligent barcode reading and Security Pin access

It's connected

- Continuous monitoring with notifications
- Accurate delivery of data and metadata
- Seamless integration with your applications
- No on-site PC or software required
- Outgoing fax

It's scalable

- Cloud-ready
- Modern, scalable architecture
- Enterprise-level security
- Tightly integrated with virtually any application
- Remotely managed
- 3 flatbeds available for specialty media and for exception processing.

From logistically challenging and slow… to fast, efficient, and secure: an INfuse Smart Connected Scanning Solution success story

Challenge

For this bank, invoice handling was manual and time-consuming — receive invoice, go to scanner, scan one invoice at a time, go back to desk, open each resulting PDF, then extract and manually keyboard invoice data into the ERP system.

Solution

To digitize documents and automate workflow, we worked with Kodak Alaris to create a customized solution. A connector to streamline invoice handling was easily installed on the bank's **Kodak** INfuse AX Scanner. With this new custom connector, the bank has reduced invoice handling time from 40 hours a month to just 10!

Results

1. **Customization for the way the bank operates**
   An employee at the bank needs to process the company's daily invoices. Now he simply walks up to their INfuse AX Scanner and loads up to 80 invoices into the feeder at once.

2. **Daily work simplified with greater peace of mind**
   The employee pushes the "Invoice Scan" button and all invoices go directly and securely into the banking system. He is promptly given feedback if the job was successfully received. The job is done and he knows it's been completed properly.

3. **Faster, more efficient workflow achieved**
   Thanks to the bank's custom connector, this job now takes seconds to complete, allowing the employee to move onto other tasks more quickly.

4. **Business processes accelerated**
   The bank's custom connector has increased workflow, reduced costs, and resulted in more productive employees and processes.

1. The large 3.5" control panel is easy to read, with custom activity names and color icons that make scanning tasks quick and easy to select.

2. Reduce host processing requirements with Embedded Image Processing.

3. Perfect Page technology optimizes image quality dynamically on every image for more accurate information extraction.

4. Compact, robust scanner fits easily on desktops in modern office environments.

5. Wired ethernet and built-in wireless connectivity enables placement of the device anywhere you need it to be.

Kodak INfuse AX Scanner Specifications

Features	
Throughput Speeds[1]	Black-and-white/grayscale/color: up to 80 ppm/160 ipm at 200 and 300 dpi
Recommended Daily Volume	Up to 8,000 pages per day
Feeder Capacity	Up to 80 sheets of 80 g/m² (20 lb.) paper
	Handles small documents such as A8, ID cards, embossed hard cards, and insurance cards
Power Consumption	Off: <0.5 watts; Sleep mode: <5.0 watts; Running mode: <36 watts
Electrical Requirements	100-240 V (International); 50-60 Hz
Connectivity	Wireless Network 802.11 b/g/n and 10/100 Ethernet (DHCP only) , USB 2.0 external accessory port
	WLAN Security- WEP 64/128 Bit, WPA-PSK, WPA2-PSK, MSCHAPv2, EAP-TLS
Environmental Factors	EPEAT Gold Registered[2] ENERGY STAR Qualified Operating Temperature: 10-35° C (50-95° F) Operating Humidity: 15% to 80% RH
Dimensions	Weight: 3.3 kg (7.2 lbs.) Depth: 204 mm (8.0 in.), not including input tray and output tray Width: 312 mm (12.3 in.) Height:182.5 mm (7.2 in.), not including input tray Depth with input tray 269 mm (10.6 in.)
	Height with input tray 231.6 mm (9.1 in.)
Approval & Product Certifications	AS/NZS CISPR 32 (Class B RCM mark), CAN / CSA – C22.2 No 60950-1 (TUV C mark), Canada CSA-CISPR 32 / ICES-003 (Class B), China GB4943.1; GB9254 Class B (CCC S&E mark), EN55032 ITE Emissions (Class B), EN55024 ITE Immunity (CE mark), EN60950-1 (TUV GS mark), IEC60950-1:2005, Taiwan CNS 13438 (Class B); CNS 14336-1 (BSMI mark), UL 60950-1 (TUV US mark), CFR 47 Part 15 (FCC Class B)
Accessories (Optional)	**Kodak** Passport Flatbed Accessory, **Kodak** Integrated A4/Legal Flatbed Accessory, **Kodak** A3 Size Flatbed Accessory

Disclaimers

1. Throughput speeds may vary depending on your choice of driver, application software, operating system, and selected image processing features.

2. **Kodak** INFuse AX Scanner is listed as the **Kodak** S2080w Scanner on the EPEAT product registry.

INfuse Smart Connected Scanning Solution

Kodak INfuse Management Software Environments

Features
Environments Supported - Requires a Microsoft Azure Cloud. Amazon Cloud (AWS), Alibaba, Windows Server 2019.*

Note: No image data is ever sent to management application; image data is separate from configuration/management controls.

*Due to a product change made by Microsoft, Docker Enterprise is no longer included with Windows Server 2019. Docker Enterprise is now part of the Mirantis Kubernetes Engine; you may obtain licensing from Mirantis for this product.

Our Solution can be customized for many industries and applications

Retail Invoicing

Healthcare

BPO/Service Bureaus

Insurance Records

Human Resources

Tax/ Accounts

Legal

General Office Equipment

Get connected with a smarter solution

The INfuse Smart Connected Scanning Solution addresses and solves multiple pain points for your operations. From easy set-up to accurate onboarding of content and instant notification of problems, it makes the entire capture process smarter and more efficient.
