How to use this kit

Contents

1. One pre-separation pad
2. One separation roller assembly

Expected use

Replace parts when they are very worn, or when cleaning does not correct page separation or feeding issues.

Before replacing any part

1. Before replacing a part, disconnect the electrical power.

2. Pull the scanner cover release lever to release and open the scanner cover.

Replacing the separation roller assembly

1. Open the scanner cover.

2. Remove the pre-separation pad by grasping it and pulling it straight out.

3. Grasp the separation roller and pull it straight

out. Discard it.

4. Install the new separation roller by aligning the tab with the slot and snapping it into position.

5. Re-install the pre-separation pad (or install a new one) by aligning the slots with the holes on the pre-separation pad and snapping it into place.

6. Close the scanner cover.

Replacing the pre-separation pad

1. Remove the pre-separation pad by grasping it and pulling it out of position.

2. Discard the worn pre-separation pad.

3. Install the new pre-separation pad by aligning the slots with the holes on the pre-separation pad and snapping it into place.

When you have replaced a part

1. Close the scanner cover.

2. Plug the scanner in and turn the power on.

3. Clean:
   - Imaging path
   - Transport rollers
   - Any parts you did not replace

   (Refer to chapter 4 Maintenance in the *Alaris S2000/S2000w Scanners: User's Guide* for cleaning procedures.)

4. Choose Maintenance at the scanner screen. Then go to the **Meters** display. Choose **Reset** ↻ for *Clean*.

5. If you replace the roller assemblies and the separation pad, at the **Meters** display you should also choose **Reset** ↻ for the *Feed kit*.

6. Wash your hands with soap and water after replacing any parts.
