

The smart, streamlined solution for medical document management

Kodak Scanners + Epic Media Manager

True synergy, speed, and security to enhance multiple aspects of your workflow and dominate medical records production. Kodak Alaris and Epic bring years of integrated partnership to your benefit, including a demonstrated “better together” experience for healthcare.

Scanners from Kodak Alaris

- Gain the superb image quality you need for the most accurate barcode scanning and OCR*
- Benefit from smooth paper handling and features like active feed, controlled stacking, and Intelligent Document Protection to safeguard documents and reduce time spent on document prep and sorting
- Rest easy with scanners in total compliance with healthcare legislation to keep patient data confidential—and routed and stored securely
- Speed information management with image rotation, cropping, deskewing, blank page removal, and other automatic features of integrated Perfect Page technology
- Simplified UI and technology for seamless connections to all EMR applications

Epic Media Manager

- Attach and manage scans, voice, video, and document files (including PDFs and TIFFs) with ease
- Connect to, and integrate with, your EMR/EHR via open-source TWAIN
- Optimize your Epic EHR System by creating more efficient workflows and enhancing productivity
 - Improve patient care coordination, reduce risks with standardized workflows, and deliver better provider-to-patient communication
 - Upgrade your data analytics and reporting

Get More Value vs. Fujitsu 7160/7180 Scanners

- 3-year warranty on most desktop scanners plus award-winning service
- Small file sizes, with superb image quality, to save network storage space and speed processing
- 20% advantage in OCR accuracy vs. competition*
- Capture both sides of hard cards and IDs with one scan
- Proven compliance and security—image data is never written to the device
- Desktop to high-volume scanners, with USB, network, and wireless connectivity

Ideal Complements to Your MFDs

If you've already integrated scanning with your multi-function device directly into your EMR/EHR for file transmission, you'll find that scanners from Kodak Alaris utilizing Epic Media Manager will offer seamless options in terms of accuracy, speed, compliance and more.
