

Looking for a document scanner that supports Cerner's Millennium Applications?

With the ever growing need for healthcare organizations to digitize patient medical records, it's comforting to know that Kodak Alaris document scanners have been validated by Cerner. All Kodak document scanners are out of the box ready to run in any Cerner Millennium Application environment without any customization.

CERNER VALIDATED DOCUMENT SCANNERS FROM KODAK ALARIS

Our Scanners

Kodak Alaris has claimed the coveted BLI 2021 Scanner Line of the Year award from the analysts at Buyers Lab thanks to its...

- Superior image quality and OCR accuracy
- Versatile media handling capabilities
- Flawless reliability
- Simple user experience

From 1,000 to unlimited pages a day, Kodak Alaris is able to support you. Combine this with our Perfect Page and paper handling innovations, Kodak Alaris can keep your medical records management system running, and add capacity where needed, without placing a burden on your IT systems or people.

DESKTOP SCANNERS

- Multiple connectivity options from USB 3.0 to wireless scanners
- Run your day to day business processes with one button document capture using Kodak Alaris' built-in SmartTouch technology
- Extract accurate, high-quality information with Kodak Alaris' onboard Perfect Page technology
- Deploy scanning infrastructure across your business with control and security using Kodak Alaris' Easy Setup mode

DEPARTMENTAL SCANNERS

- Power through volumes of up to 50,000 pages per day with Kodak Alaris' compact departmental workgroup scanners
- Prevent document damage and save time with Intelligent Document Protection that listens for and alerts you to potential problems
- Automate your document processing with Kodak Alaris' built-in barcode reading and Perfect Page image processing

PRODUCTION SCANNERS

- Reduce processing costs with capabilities that put users in control
- Fast scanning throughput with speeds up to 210 pages per minute
- Experience peak productivity and image quality
- Sort documents with select models so post processing costs can be minimized
