

Kodak Passport Flatbed Accessory

Streamlined Passport Scanning

Our modular passport scanning accessory makes it easy to quickly scan identity documents.

The **Kodak** Passport Flatbed Accessory takes your customer-facing environment to a higher level. Scan any passport, in any condition or thickness, regardless of material (including polycarbonate) and without it ever leaving the owner's sight.

Compact and Efficient Design

The Passport Flatbed Accessory sits securely under a wide range of our office scanners, and its compact size relative to competing products enables you to save up to 40%* more desk space.

All inclusive - without limits

Designed to scan the widest range of passport types from anywhere, even the most challenging "double passport" type where two passports are stapled together.

Eliminate risk with safe document handling

No more blurry carrier sheets or liability claims due to damaged passports when fed through the scanner. Our passport accessory is a safe, low-risk solution that starts scanning as soon as a passport is placed on the glass.

Simple one-touch operation

With **Smart Touch technology** built into every **Kodak** E1000, S2000, and S2000w Series Scanner, it's easy to automate routine passport scanning with a touch of a button.

Easy installation that makes sense

Simply place your compatible scanner into the passport accessory with a USB connection. No tools, no software, no power cords. It doesn't get any easier.

E1030 / E1040

S2050 / S2070

S2060w / S2080w
