Kodak i1190WN Scanner

Shareable. Powerful. Versatile.

Transform Your Office with Our Wireless Network Scanner

Let your workplace break free

Wireless working has transformed the modern office. People are no longer chained to their desks. A laptop and Wi-Fi connection is all you need to be able to work anywhere. It's made offices more productive and IT more cost effective to manage.

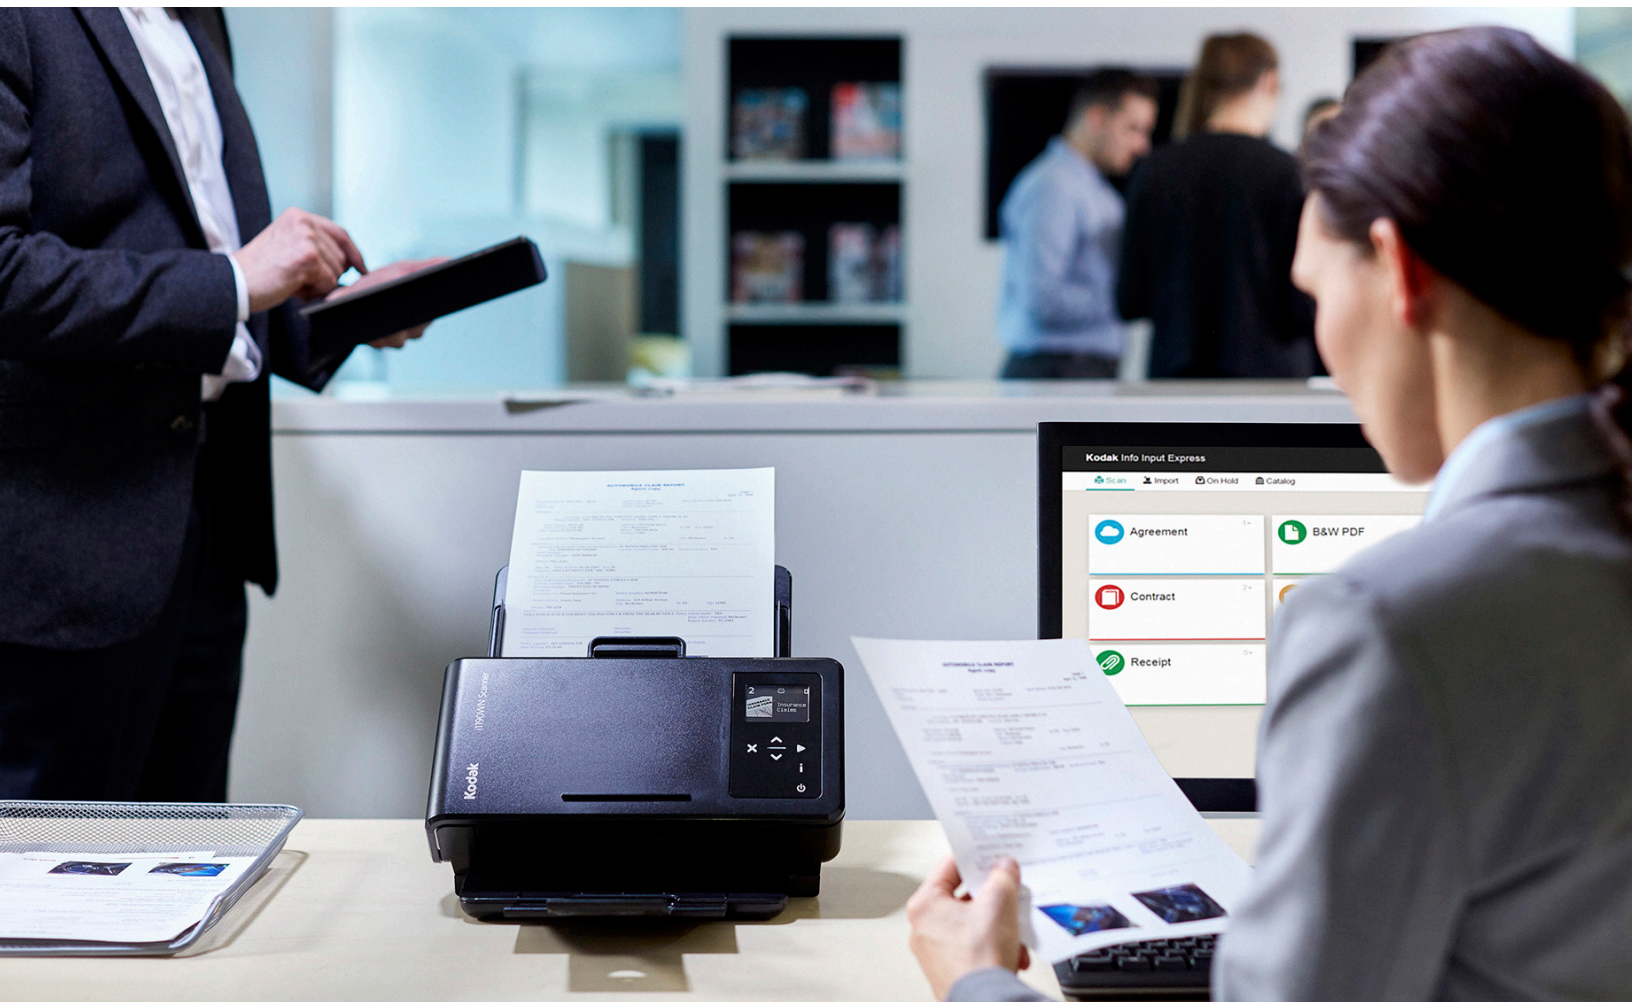

Now this transformation is coming to the world of scanners too thanks to wireless technology.

Free to share and collaborate

With the new i1190WN wireless network scanner you can share one scanner with many users. There are no cords or cables keeping it fixed in one place, which means you can easily move it around the office. It's the perfect scanner for sharing and work collaborations. And it can handle everything from ID cards to complex business documents.

You don't need lots of expensive IT or powerful PCs to support it either, which saves you money. You can easily integrate it with your existing business applications and create new custom integrations. And you can even manage security levels and settings.

Welcome to a new world of flexible, versatile, powerful, convenient and stress-free scanning. The new wireless and network **Kodak** i1190WN Scanner makes life a lot easier and more efficient for any business.

Ten big reasons to scan wirelessly

Don't let your business miss out on the power of wireless network scanners. Here are ten big reasons we think they are a game-changer.

1. Easy to share

More than one person can use a wireless network scanner. They are great to share at teller windows or a customer service counter so you can scan in front of the customer.

2. IT friendly

Integrates easily with existing business applications using standard drivers. Or use the Web API to integrate your business app or application to the scanner directly without the need for a driver.

3. Simply secure

Set and control your own level of security with ease. Or use the Web API to build additional levels of security with HTTPS.

4. Web friendly

Great to use with web-based capture applications, If you are looking for a web-based capture solution that is powerful, easy to manage, and easy to use, the [Alaris Info Input Portfolio](#) can empower your enterprise.

5. Simple network set up

Just print and scan the encrypted QR code created during the EasySetup process.

6. Cable free

The clue is in the name. They're wireless, which means they are neat and tidy with no cable clutter. Because wireless networks are less expensive to set up and maintain, the i1190WN scanner helps you make the most of your infrastructure.

7. Top quality imaging

Scan everything from ID and credit cards to a wide range of business documents in high quality resolution with Alaris Perfect Page image enhancement technology and reliable document feeding.

8. Simple to use

An intuitive display panel makes scanning tasks quick and easy. The display shows whose scanning job is in progress so you can ensure your document images are being sent to the right user's device.

9. Easy to move around

Wireless network scanners are portable and compact. They're great for collaborative open plan offices/ small workgroups to be moved where the action is.

10. Scan to any device

Capture information to your computer, mobile or tablet.

Super-versatile

If you're looking to transform your scanning capabilities, a Wireless Network scanner could be just the thing. They offer you versatility to:

- Connect with USB, Ethernet, wireless infrastructure or wireless ad-hoc networks
- Use the Web API to integrate to the scanner directly without the need for a driver
- Work with thick client or cloud-based business applications
- Protect your investment in capture infrastructure. You can use the i1190WN Scanner with legacy applications today and move to cloud-based capture applications in the future.

The ScanMate+ app

Use the app to find an i1190WN wireless scanner close by, put some paper in the scanner and press scan. The scanned image will then appear on your device. You can share it via email, upload to an app or keep it on your device. Or you can create your own mobile interface using our Web API integration with your enterprise mobile app.

The app is free and available from the [iTunes App Store](#) or [Google Play store](#)

Our extra service package

We're here just in case you would like assistance with remote or on-site setup, configuration, and training; remote configuration optimization; custom web application creation; complex installation support or any other custom requests.

Invest in better web-based capture software

If you're also looking for a web-based capture application for your business, then our Alaris Info Input Portfolio is it. The software is easy to use with our scanners and makes capture faster, smarter, more secure and more productive
