Homeworking Solutions from Kodak Alaris

Working for those based in **a home office or in the field has challenges**

When working remotely, employees need to have a way to virtually handle paper, ensure that data is captured correctly the first time, and take that information and place it into a back-end system as fast as possible. All this needs to be done in a secure manner and still provide an audit trail(chain of custody). There are key tasks they have to do such as approval sign-offs, processing contracts, and submitting personal expenses, all of which need to be scanned.

Our **Scanners**

With a simple user interface, award winning features, superior image quality, and flawless reliability; both the S Series and E Series range of desktop scanners are ideal for home workers. The S and E series scanners are the right solutions to the challenges of getting the best image to the right locations with ease.

E1000 Series Scanners and imaging software provide you with a solution to bring your paper documents into your existing workflow and to convert them into information.

S2000 Series Scanners capture information faster with workgroup-level processing power in an efficient desktop scanner.

Why a Kodak Alaris Scanner?

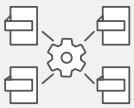
Both the E and S series are equipped with Smart Touch and Perfect Page technology, which allows paper documents to be converted into clear digital files, extract key information from each page, and route files to where they are needed; all with the single press of a button. Kodak Alaris are among the best performers; winning Buyers Lab 'Scanner Line of the year' four out of five times since 2016.

Smart Touch

Smart Touch technology software allows you to easily create searchable PDF's (or other types of images) and send the document to a file location or common cloud services with the touch of a button. Included with most scanners from Kodak Alaris, you can eliminate complicated multi-step scanning processes with one-touch simplicity.

Automatically attach scanned documents to an email

Create image only or searchable PDF files



Scan documents into PDF, Microsoft Word, or image file formats

Output to a folder or cloud service in many formats (TIFF, JPEG, BMP, PDF, sPDF and more)

Print your documents on any networked office printer

Send to common destinations like email, Microsoft Office, Adobe Acrobat, Microsoft SharePoint, Nuance PaperPort, Nuance OmniPage, or other third-party applications

Perfect Page

Document scanning is a cornerstone of digital transformation, and choosing the right technology is essential to get the right results. A scanner's image enhancement capabilities can dramatically reduce the time spent handling documents and can deliver more accurate information to automated workflows. Many companies overlook the bottlenecks that are related to image quality, but investing in the right technology upfront can reap big dividends right away.

Supported by Kodak Alaris

Access the highest levels of support; with a Kodak Alaris expert who can assist in remote installation, set-up and resolve your scanner issue. Our desktop scanner range comes with **3 years free Advances Unit Replacement (AUR)**, if the scanner cannot be fixed remotely. Maximize your productivity by receiving a replacement scanner as early as the next business day.

Please contact your preferred provider for more information on how Kodak Alaris can help support you.
