

Upgrade to Info Input Express Network Edition

Maximize your productivity

Alaris Info Input Express is an easy, intuitive web-based solution that allows for simple scan and capture so you can convert and submit documents to your desktop or business systems. Info Input Express Limited Edition (LE) comes bundled with our Alaris S2000 Series Scanners. Upgrade to Info Input Express Network Edition (NE) for additional features so you can be even more productive.

LE and NE features:

Application Launch

Scanner buttons, system tray, desktop icon for launch, big button GUI.

Scanner Support Buttons

Legacy, S2000 USB, S2000 Network, S2000 Multiuser.

Output Destinations:

Local C drive, network file system, web DAV folder, Dropbox, Google Drive, MS OneDrive, MS Sharepoint.

API's and Integration

Provider configuration for cloud-based destinations, invoke other program, launch customer application.

IN2 Ecosystem Integrated Scanner Features

Intelligent Barcode Reading.

Catalog:

Index field metadata search, document links, activity filtering.

Upgrade to NE for:

Added centralized job management features

You can create scan and import activities once and they will be immediately available to all users in your organization.

More user and group support

Your users can be assigned to groups for ease of administration, or for sharing of scan and import activities, indexing, and catalogs.

Enhanced file options and indexing

Assisted indexing support allows you to index documents faster by providing suggestions based on previously indexed documents with unlimited index fields.

Greater flexibility

Mobile applications are available so your mobile workforce can capture and submit data the same way your office workers do.
