

Kodak Info Input Solution

Intelligent Document Processing Automation for Everyone, Anywhere

Digital Transformation Challenges

With so much information flowing into organizations, people need solutions that quickly, accurately, and automatically organize and extract key data to help the business operate more efficiently and to help leaders make more informed decisions. Through automation, organizations need to improve the speed and accuracy of document-heavy business processes — like invoice processing, customer onboarding, order processing, patient onboarding, and claims processing.

Enterprise Level Complexity

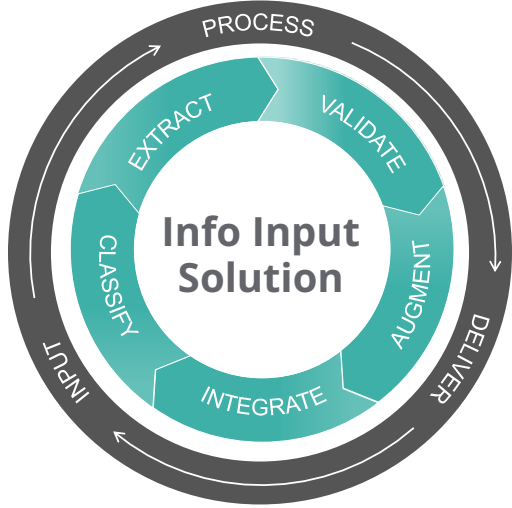

As the river of incoming documents becomes a flood, it is increasingly difficult to fish high-quality data out of the rapids and get it where it needs to go. The current manual processes designed years or decades ago aren't sustainable or scalable. To meet these needs in the fastest, most cost-efficient, and consistent manner, automation is paramount. It requires a solution that is easy to use and manage and that simplifies the whole process — which means minimizing human intervention and leveraging intuitive automation from start to finish.

Kodak Alaris Is Where Digital Transformation Starts

Incredibly intuitive, fiercely flexible, and exceptionally scalable, **Kodak Info Input Solution** intelligently onboards documents of any complexity from any source — email attachment, scanned paper, or mobile upload — and automatically transforms them into information that can be validated and integrated directly into downstream systems and RPA tools. The intuitive, customizable user interface with no-code configuration requires minimal training and delivers surprisingly short time-to-value.

Web-Based Automation For All

Info Input requires just a single instance in a single location, giving all users access to consistent automated processes through an intuitive web-based interface. It greatly reduces your IT workload and shortens maintenance time with central administration of all users and business rules.

Automate the trip from document arrival to usage in business process quickly, accurately, and reliably.

“This solution has virtually 100% uptime, which is amazing considering we have over 6,000 users throughout the state responding to requests for vital services.” – IT Director, State Department of Human Services

Extend your capture and automation to the edge of your enterprise

With **Info Input Solution**, you can easily capture complete, accurate information on the first scan. The intuitive user interface requires minimal training and reduces errors with one-button easy scanning from within your business applications.

Capture data using a mobile app or extract it from a variety of digital file types across your organization, even off-site. Intelligent features like classification, advanced indexing, and extraction get information into your business processes quickly and accurately.

Benefits you can expect with Info Input Solution

- **Scalability:** Empower fast and sustainable business growth, from a single department to complex, high-volume enterprises.
- **Ease of Use:** Guarantee adoption with an intuitive drag-and-drop user interface that requires minimal training — so your UI can look exactly like the form you're verifying.
- **Simplified Processes:** Utilize the same document processing capabilities for both digital and paper-based content.
- **Customer Experience:** Wipe out delays and wait times by automatically extracting key data from documents via bar code, OCR, ICR, OMR, or handwriting recognition engines.

Enterprise Level Integration

In today's connected world, integration and connectivity are everything.

Info Input can be integrated into many existing and legacy business systems — including some of the leading document management, ECM, and workflow solutions on the market — which is key to driving productivity on an enterprise scale.

Enterprise Level Intelligent Document Processing Automation

Changes in the way we all work have led to an increased urgency for smart, distributed data onboarding solutions. Regardless of your size, you need a flexible automation solution that goes to work for you.

With over 150 patents for innovations in image capture and processing — and a proven track record of exemplary service and support — Kodak Alaris is helping businesses think in new and innovative ways. Simplify business processes, harmonize data across departments, and scale your business faster with **Info Input Solution**.
