

## **VRS 4.20.032 OEM BBH/Kodak Software Release Notes**

### **VRS\_4\_20\_032-OEM Summary**

**Purpose of Release:** This software was provided to allow Spectrum XF, Trüper 3200/3600 and Sidekick 1200/1400/1400u owners to upgrade to the VRS 4.20 version.

**Date:** March, 2010

**Versions:**

VRS: 4.20.032

**New Features and Improvements from previous VRS versions:**

(see [www.kofax.com](http://www.kofax.com) )

**Installation Instructions:**

The ZIP file should be downloaded and installed in an empty directory on the scanners host PC. The file setup.exe should be executed to start the installation.

**Notes:**

1. New Versions of VRS are available for the Spectrum XF, Sidekick and Trüper and Ngenuity Series scanners. You should consider upgrading to the latest version.
2. This OEM version package of VRS is only intended for upgrade use on the Spectrum XF, Sidekick and Trüper Series scanners. Do not use this OEM version of VRS on any other scanners. All other Kodak scanners use the 'generic' VRS that is available for trial download from [www.kofax.com](http://www.kofax.com). (to use VRS with other Kodak scanners a VRS license will need to be purchased from Kofax)
3. Although VRS 4.20.032 was released with the Ngenuity Series scanners please use the Ngenuity full installation CD if installing this version of VRS on an Ngenuity Scanner.
4. During a VRS 4.2 upgrade it is important to keep the current VRS license intact during the upgrade. **DO NOT** uninstall or deactivate any VRS license prior to installing VRS 4.2.
5. During VRS 4.2 installation, be sure to always select the proper scanner model. **DO NOT** check the box "I will select my scanner later."
6. This OEM VRS 4.2 can be installed on top of Kofax's general release of VRS 4.2.
7. For the Trüper/Sidekick/Ngenuity BBH/Kodak scanners, do not download or install any other version of VRS. The VRS source should be the BBH/Kodak installation CD-ROM, that comes in the product box or a download obtained from a link provided by BBH /Kodak on its web site.
8. If you are installing VRS 4.x on a non-English Windows XP operating system, please refer to the VRS 4.2 release notes or call Kofax before attempting installation.
9. If you are installing VRS 4.2 onto a scan station PC with Kofax Ascent or Kofax Capture, please refer to the VRS 4.2 release notes or call Kofax before attempting an install.
10. VRS Standard or Production License levels will be retained with this upgrade to version 4.20.032
11. Be certain to read all VRS installation notes in our FAQ section for important upgrade and installation information.
